I'll try that out I read you can use an EQ but I didn't know if it really had the same effect as what I am trying to do with the low pass.

I can't remember off the top of my head if the channel strip has a high pass Look for a button/knob for low cut, it may be called that.. I know there is no support for the free version but thought I'd ask in the forums.. How can I apply a high pass filter in the free version? If there is not a way to do it I may turn on the 30 day trial of the full version but I was kinda waiting to do that until I feel more comfortable using the new software so I know what I'm doing when I start the trial.. Offline What are you trying to do? Free does not include Pro EQ, you would need to use the channel strip.. I am trying the free version out and have already decided to buy it as soon as I can afford to. cea114251b [Бетховен Крейцера Соната Скачать Mp3](#)
