FAQ

[Bs 5400 Part 2 2006 Pdf Free](#)

The method given in 4.1.3 a) of part 5 should not be used, when the relationship between loading and load effects is non linear, and the values of  $\gamma_m$  for structural steel given in Table 1 of Part 5 should not be used and reference made to Table 2 of Part 3.

It is intended to revise Parts 3 and 5 to coordinate them fully after there has been sufficient experience of their application.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

**Compliance with a British Standard does not of itself confer immunity from legal obligations.**

#### Summary of pages

This document comprises a front cover, an inside front cover, pages i to vi, pages 1 to 46, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
